

Humate Plus™

19% HUMIC ACID

PRODUCT BENEFITS

ENHANCED ROOT DEVELOPMENT

Aids root development
for increased
nutrient acquisition

IMPROVED CEC IN THE RHIZOSPHERE

Increases CEC to
improve nutrient availability
in the rhizosphere

ENHANCED NUTRIENT & WATER RETENTION

Helps retain water and
nutrients in the root zone for
greater plant availability

Humate Plus™ is a highly concentrated humic acid solution that uses our Transit® biostimulant to improve soil cation exchange capacity (CEC), nutrient retention, water availability, and healthy crop growth.

Healthy crop growth begins with a productive root zone that efficiently retains and supplies water and nutrients. Humate Plus improves cation exchange capacity (CEC) in the rhizosphere, increasing nutrient and water retention to support greater nutrient availability, improved uptake, and more efficient plant growth.

Improves root development
and plant growth

MODE OF ACTION

Humate Plus uses concentrated humic acids and our Transit biostimulant to improve cation exchange capacity (CEC) in the rhizosphere. Humic compounds chelate and complex soil cations, increasing nutrient and water retention while supporting nutrient mobility and plant uptake for improved growth efficiency. Transit supports root development through the up-regulation of auxin transporters. Together, humic acids and Transit aid root growth and nutrient use efficiency for improved crop performance.

Humate Plus™

19% HUMIC ACID

Contact your Sumitomo Biorational representative to discuss product fit, use, and application for optimal performance.

GUARANTEED ANALYSIS

Soluble Potash (K_2O) 5.0%
Derived from: Potassium hydroxide.
Also contains non-plant food ingredient.
19% Humic Acids derived from Leonardite.

CROP	USE RATE	APPLICATION TIMING
All Crops	0.5 – 1 qt/ac	Apply any time during the growing season; repeat as needed.

APPLICATION NOTES

- Apply directly to the root zone whenever possible.
- Integrate with your existing fertility program to improve nutrient availability.
- Reapply throughout the growing season as needed to support active crop growth.
- Refer to the product label for complete application instructions.
