Tomato Portfolio SOUTHEAST

VALENTBIOSCIENCES.COM/BIOSTIMULANTS

Product	Overview	Formulation	Use Rate	Application Timing	Package Size	Average Acres/Case
Symvado® SC	Symvado® SC Mycorrhizal Inoculant enhances crop success for greater ROI. Using our unique MycoApply® Arbuscular Mycorrhizal Fungi (AMF), Symvado SC improves nutrient uptake and efficiency, optimizes fertilizer availability, and increases water acquisition. It also positively impacts the soil environment for greater crop production efficiency.	Symvado SC	4 fl oz/ac	At Planting	4 x 1 gal	128
Zicron®	Zicron® is a zinc, manganese, and sulfur product built with Transit® biostimulant, designed for high nutrient mobility and uptake within the plant. With organic acids from our Transit biostimulant and key nutrition, Zicron supports root development, fruit set, and fruit development. There are also Zicron formulations suited for organic systems and CAN-17 and CN-9 compatibility.	Zicron Soil	1 qt/ac	At Planting	2 x 2.5 gal	20
Sweetsei™	Sweetsei™ improves uniform fruit ripening and sizing. Designed with an organic matrix that integrates the main biochemical intermediaries of key plant pathways for ripening and color, Sweetsei influences fruit maturation for larger, sweeter fruit and more profitable harvests.	Sweetsei	32 fl oz/acre	Early Ripening (Breaker-Turning)	2 x 2.5 gal	10
