

SuperSede® Cotton

BIOSTIMULANT SEED TREATMENT

PRODUCT BENEFITS

BETTER GERMINATION

Improves germination rate for plant uniformity and stand count

ENHANCED GROWTH

Promotes shoot growth, root establishment, and vegetative growth

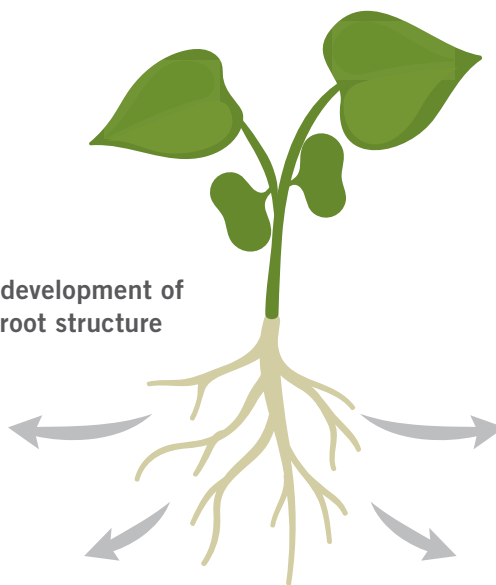

TARGETED COTTON NUTRITION

Provides key nutrients to support seedling growth

SuperSede® Cotton is a seed treatment powered by Transit®, designed with key nutrition for cotton.

Successful crop establishment begins with rapid germination and early root development; however, weather after planting does not always support vigorous early growth. SuperSede Cotton combines Transit with targeted cotton nutrition to improve germination, strengthen early root development, and establish a more vigorous, uniform crop stand.

Promotes development of a larger root structure

MODE OF ACTION

SuperSede Cotton supports the down-regulation of catabolic genes to improve germination while stimulating vigorous root growth. At the same time, Transit up-regulates auxin transport pathways, further strengthening root architecture. When combined with key nutrients for cotton germination and establishment, SuperSede Cotton optimizes crop performance for strong, uniform stand establishment.

GUARANTEED ANALYSIS

Boron (B) 1.0%
Manganese (Mn) 0.25%
Zinc (Zn) 0.25%
Derived from: Manganese sulfate, zinc sulfate, and boric acid.

CROP	USE RATE	APPLICATION TIMING
Cotton	0.75 fl oz per 100 lbs	Seed Treatment

PACKAGE SIZES

4x1 gal

2x2.5 gal

APPLICATION NOTES

- Apply using seed treatment application equipment with sufficient liquid to ensure even coverage.
- Shake the bottle of SuperSede Cotton well before use.
- DO NOT use treated seed for food, feed, or oil.
- Can be used with many common fungicides and insecticides.
- Compatibility: Conduct a standard jar test before mixing a slurry.
- Recommended mixing order: Water, polymers, pesticides, SuperSede Cotton, fertilizers, then remaining water.
